LinkedIn: pradeep-ahirwar-78830717a

PROFESSIONAL SUMMARY

Java Backend Engineer with 5+ years of experience developing scalable enterprise applications using Java, Spring Boot, and distributed microservices architecture. Experienced in Spring Cloud (Eureka, Config Server, API Gateway), Kafka messaging, Redis caching, Docker containerization, and Jenkins CI/CD pipelines. Strong background in secure REST API development, performance optimization, and highly available backend systems.

TECHNICAL SKILLS

- **Programming Languages:** Java 8/11/17, SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate
- **Microservices & Cloud:** Spring Cloud, Eureka Server, Config Server, API Gateway, OpenFeign, Resilience4j
- **Messaging & Event Streaming:** Apache Kafka, RabbitMQ
- **Caching:** Redis
- **Databases:** Oracle, MySQL, MongoDB
- **Build & Dependency Management:** Maven, Gradle
- **Version Control:** Git, GitHub
- **DevOps & CI/CD:** Docker, Jenkins
- **API Documentation:** OpenAPI (Swagger), Postman
- **Monitoring & Logging:** Spring Boot Actuator, Zipkin, Spring Cloud Sleuth
- **Testing:** JUnit 5, Mockito
- **Frontend Technologies:** JSP, Thymeleaf, HTML5, CSS3, JavaScript
- **Application Servers:** Apache Tomcat
- **Development Tools & IDEs:** IntelliJ IDEA, Spring Tool Suite (STS), Eclipse, NetBeans

PROFESSIONAL EXPERIENCE

Java Developer

Xtranet Technologies Private Limited — Bhopal, India

Jan 2022 – Present

- Designed and developed distributed microservices using Spring Boot and Spring Cloud including Eureka, Config Server, and API Gateway.
- Implemented inter-service communication using OpenFeign clients and asynchronous messaging with Kafka.
- Built centralized configuration management for multiple environments using Spring Cloud Config Server.
- Integrated JWT-based authentication and authorization using Spring Security across microservices.
- Containerized applications using Docker and automated build/deployment pipelines through Jenkins.
- Implemented circuit breaker and retry patterns using Resilience4j to improve fault tolerance.
- Introduced Redis caching to reduce API response time by 40%.
- Optimized SQL queries and backend logic, improving application performance by 35%.
- Developed 25+ REST APIs supporting business workflows and external system integrations.
- Used Zipkin and Spring Sleuth for distributed tracing and debugging across services.
- Maintained 99.9% system uptime in production environments.

Apprentice Engineer

HEG Limited | Raisen, India
Jan 2017 – Oct 2018

- Assisted in development, debugging, and testing of enterprise applications.
- Participated in code reviews and Agile delivery processes.
- Improved development efficiency by 15% through process improvements.

KEY PROJECTS

Vehicle Permission / Pass Management System— Microservices Architecture

Developed a cloud-native vehicle permission and pass management system using a microservices architecture. Designed independent services for employee management, vehicle registration, request processing, document management, and notification workflows. Implemented service discovery, centralized configuration, API Gateway, asynchronous messaging, caching, containerization, and CI/CD.

Technologies: Java 17, Spring Boot, Spring Cloud, Eureka Server, Config Server, API Gateway, Kafka, Redis, Oracle Database, Docker, Jenkins

Workforce Extended System — MVC Architecture

Developed an enterprise workforce management application using the Spring MVC architecture. Implemented modules for employee management, attendance, payroll, leave management, and reporting. Designed secure REST APIs, integrated Oracle Database, and optimized SQL queries for improved application performance.

Technologies: Java, Spring Boot, Spring MVC, Spring Data JPA, Oracle Database, REST APIs, Maven, Git

Admin Expenses Management System — Monolithic Architecture

Developed a secure enterprise expense management application using a monolithic architecture. Implemented expense request, approval workflow, reimbursement processing, and role-based access control. Secured APIs using JWT authentication and integrated asynchronous messaging for notifications and background processing.

Technologies: Java, Spring Boot, Spring Security, JWT, RabbitMQ, Oracle Database, Docker, GitLab

EDUCATION

Bachelor of Engineering in Information Technology

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV), Bhopal | 2016

CORE STRENGTHS

Microservices Architecture | REST API Development | Performance Optimization | CI/CD Automation | Distributed Systems | Secure Backend Development

CERTIFICATIONS

- Technology-Based Entrepreneurship Development Program (TEDP)
- HTML Foundation
- CSS Foundation
- SQL Foundation
